Subject: OPW Fuel Management Systems FSC3000™ Now Available with IP Authorization Gateway - Converts FSC3000™ to high-speed for inbound and outbound communications

Dear Valued Distributor:

OPW Fuel Management Systems is proud to announce that it now offers the OPW Petro Vend IP Authorization Gateway for use with its FSC3000™ fuel site controller. By utilizing the IP Authorization Gateway, the FSC3000™ now has the capability of using an Internet connection instead of a dial-up phone line to authorize fleet and credit card transactions, creating a better on-site experience for customers with faster transaction approval times.

[View the IP Authorization Gateway Data Sheet \(PDF\)](#)

The IP Authorization Gateway gives fleet owners and retailers the ability to deploy the OPW FSC3000™ over a high-speed IP connection. Compared to phone lines that transmit at only 24 Kbps, IP networks transmit at 100 Mbps, delivering faster, more reliable transactions. The IP Authorization Gateway creates a secure outbound IP connection for card authorizations while allowing for inbound communications to the fuel control system. Unlike other converter devices, the IP Authorization Gateway is certified to communicate with OPW Petro Vend standard card authorization networks including Paymentech™, NBS, CFN, T-Chek™, TCH, Intevacon and Fuelman®.
