Phoenix SQL Lite Pricing:

A trade-in program is available for existing Phoenix for Windows customers. Contact your FMS Commercial District Manager for details about the offer.

Phoenix SQL Lite replaces OPW's Phoenix for Windows programs – Phoenix Premier™ and Phoenix Plus™ – and supports OPW's FSC3000™ Fuel Site Controller-based fuel control systems, including the K800 Hybrid™, C/OPT™ and FIT500™. Designed for easy installation on a single PC-based workstation, Phoenix SQL Lite is fully compatible with Windows® 7, 8 and 10 and represents an ideal upgrade path for Phoenix Premier and Phoenix Plus users. Phoenix SQL Lite's interface for OPW and third-party automatic tank gauges enables SQL Lite to perform site reconciliation. There is no extra charge for this feature.

Initiating a 60-Day Trial, Activating a License and Scheduling Training

By downloading and installing a trial of OPW's Phoenix SQL Lite software, customers have access to a fully functional, two-site configurable version of the software for 60 days. Customers who purchase a software license within those 60 days may simply continue to use the version they downloaded for their trial (no additional downloads are necessary).

When an order for the software is placed with OPW Customer Service, OPW will email customers their Phoenix SQL Lite license's serial number, as well as instructions for activating the license within the 60-day trial version of the software that they installed on their PC. Customers will be prompted via the same email from OPW to schedule a start-up and training session through OPW Technical Support.

OPW's Phoenix SQL Lite Is:

- ✓ **Easy to Install:** Phoenix SQL Lite can be downloaded from OPW's website for installation on Windows-compatible PCs.
- ✓ **Easy to Learn:** Windows-based program features an intuitive, user-friendly interface.
- ✓ **Easy to Use:** Phoenix SQL Lite streamlines all aspects of fuel management through comprehensive reporting options, a custom import/export feature, ability to interface with back-office software and fleet maintenance programs and much more.
