

M00-AFC1015-PROT Installation Instructions

The AFC 1015-PROT is designed to minimize damage to the AFC1010 from electrical interference.

The kit consists of the 20-8035-PROT junction box cover.

The AFC1015 installation kit for the AFC1010.

Cable 20-1658 to connect the junction box to the AFC1010.

- 1. Connect the 20-1658 cable the “ABC” connector in the AFC1015 kit:**

BROWN = A

RED = B

$$\mathbf{SHIELD} = \mathbf{C}$$

- 2. Plug the cable into the back of the AFC1010.**

- 3. Install a junction box within 6 feet of the AFC1010, run Belden 8760 cable from the AFC communication terminal to the terminal on the junction box cover.**

AFC terminal “A” to cover “1”

“B” to cover “2”

“C” to cable shield DO NOT CONNECT AT JUNCTION BOX

Be sure to ground the “G” terminal at the junction box and ground the green wire at the AFC1010.
