

Breakaway Plug & Cord Set

PART NUMBER

Rev. +, Aug. 2010

Civacon Breakaway Plug & Cord Set helps prevent equipment damage and reduces downtime. Available in optic and thermistor configurations.

Civacon's breakaway plug & cord set is designed to prevent equipment damage while saving operators time and money from costly unplugged drive-aways. This breakaway feature utilizes the same high quality materials as the standard plug and cord sets for reliable operation that is corrosion resistant for durable longevity.

7391S-0020 Breakaway Thermistor Plug

Features and Benefits

- Lightweight molded plug for ease of use/handling
- Stainless steel contact pins for corrosion resistance and long life
- Heavy gauge springs to ensure strong reliable electrical connections
- 18-gauge tinned wire for corrosion resistance and longer product life cycle
- High visibility, 30' coiled cord for ease and safety
- Color coded wiring for easy identification
- Stainless steel interlock screws with 3/4 opening for easy replacement
