

Phoenix Premier™ Fuel Management Software

Total Site Reconciliation from a PC-Friendly Interface

Full-featured software automates card management, transaction polling and inventory reconciliation from a user-friendly Windows-based platform.

Phoenix Premier™

Phoenix Premier™ Fuel Management Software automatically polls FSC3000™ / System2™ Fuel Site Controllers for site, account, card and transaction data, and compatible tank gauges for inventory data. The software instantly reconciles transaction data with tank gauge data to provide comprehensive fuel inventory information in real time.

Applications

- Automation streamlines inventory management, reconciliation and compliance reporting procedures
- Most data can be exported to third-party database spreadsheet and fleet maintenance programs for further processing
- When used with compatible fuel site controllers, LAN/WAN connection enables data from multiple sites to be centralized into one computer

STREAMLINED

Automates data collection processes, consolidating inventory data from all sites in a single PC application

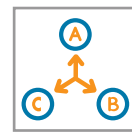

ACCURATE

Reconciles dispenser inventory data with tank inventory data in real time

EASY TO USE

Intuitive, Windows-based interface is easy to learn, which reduces training expenses

COMPATIBLE

Communicates with OPW Tank Gauges and other tank gauge brands to seamlessly integrate into most fuel management systems

Contact your OPW representative to learn more about the Phoenix Premier™ Fuel Management Software today!

Phoenix Premier™ Fuel Management Software

Features

- ◆ Polls Petro Vend FSC3000™/System2™ for site, account, card, and transaction data, and OPW tank gauges (or other brands of automatic tank gauges) for real-time fuel inventory information for reconciling a site's fueling activities
- ◆ Ideal for owners of multiple fuel sites who want to integrate the management of their facilities into one centralized computer
- ◆ Based on Phoenix™ Plus software package, and includes full-featured back-up and restore, automatic and on-demand transaction polling, card management, and over 60 reports
- ◆ Runs on a Windows® PC – compatible with Windows XP® or Windows Vista®
- ◆ Provides communication through modem, Ethernet, or direct connection
- ◆ Eliminates the need for two (2) separate lines and modems when polling via phone lines
- ◆ Automatic and on-demand transaction polling enhances ease of reporting reconciliation information
- ◆ Centralized card database for multiple sites (FSC3000™ and System2™ version only)
- ◆ Facilitates daily inventory management
- ◆ Reduces training costs – Windows®-based program is easy to learn, easy to use
- ◆ Stores records in your back-office PC environment for easy retrieval and management
- ◆ Enhanced Odometer Checking reveals obvious, incorrect mileage entries such as single, sequential or repeated numbers
- ◆ Interfaces directly with all OPW tank gauges and most third-party tank gauges
- ◆ Interfaces directly with FSC3000™, System2™ and K800 fuel site controllers

Hardware Requirements

- ◆ A K800™, K800™ Hybrid, C/OPT™ or FIT500™ Fuel Control System
- ◆ A Windows® PC with 500 MHz or higher processor speed running Windows XP® or Windows Vista®, 128 MB RAM, CD-ROM drive, 250 MB hard disk space, 800 x 600 display and available communications port
