The benefits of multi-drop

The SiteSentinel® Integra 500™ comes with the option of either an internal 4-channel multi-drop I.S. module or an externally connected VSmart.

This multi-drop technology allows for a drastic reduction in the number of home runs needed to both tanks and dispensers in any installation, by allowing multiple sensors and leak-detection devices to be run back to the tank gauge on one wire.

- *Slash wiring, conduit and labor costs for your installations*
- *Offer more competitive rates, while maintaining per-project profit*
- *Decrease installation turnaround times*

Installation Cost Comparison

TYPICAL 3-TANK, 4-DISPENSER ISLAND INSTALLATION

Wire use and waste with Integra 500™

1,050 ft (2.1 spools) used | 450 ft (.9 spools) wasted

Wire use and waste without Integra 500™

2,980 ft (5.96 spools) used | 2,020 ft (4.04 spools) wasted

CONDUIT NEEDED

With Integra 500™

44 pieces (440 ft)

Without Integra 500™

77 pieces (770 ft)

LABOR NEEDED

= 8 hours of labor

With Integra 500™

Without Integra 500™
