

# FlexWorks BlueLine™ Pipe

## FlexWorks BlueLine™ Pipe

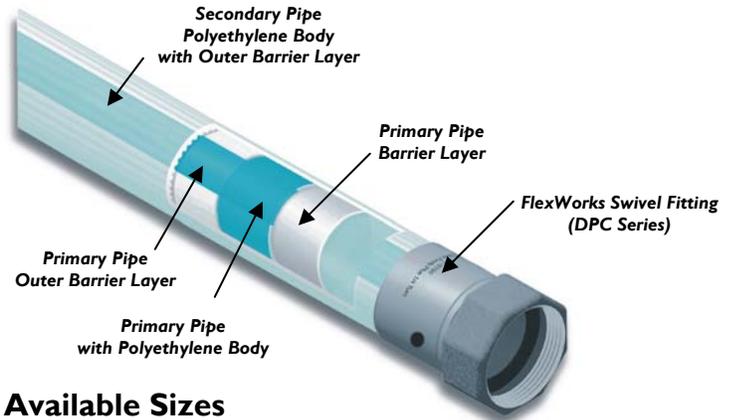

BlueLine™ piping is a flexible underground fuel piping system that is available in single wall and double wall construction and in 38.1 mm, 50.8 mm and 76.2 mm (nominal inside pipe diameters).

BlueLine™ can be used for suction or pressure fuel delivery applications. BlueLine™ may also be used for underground tank vent lines and stage II vapor recovery lines.

BlueLine™ has fuel barrier layers on both the inside and outside of the primary pipe. These barriers block fuel permeation. Note: Currently, no approvals are available for our FlexWorks BlueLine pipe.

### Features and Benefits

- **Fewer Joints:** As piping runs are continuous, flexible piping has more than 50% fewer piping joints than rigid fiberglass, fusion and steel piping systems.
- **Contained Joints:** As piping runs are continuous, all fitting connections can be made within a containment sump.
- **Faster Installation:** BlueLine™ flexible piping is typically five (5) times faster to install than rigid piping systems.
- **Crack Resistant:** BlueLine™ is a durable pipe that is resistant to cracking during shipping, installation, ground movement and surface loads.

### Available Sizes

Single Wall: 1-1/2", 2" and 3"

Double Wall: 1-1/2", 2" and 3"

### FlexWorks BlueLine™ Double Wall Flexible Pipe Ordering Specifications

Part #	Application	Packaging			Dimensions			
					I.D.		O.D.	
					in	mm	in	mm
BLP-2150B	BlueLine™ Double Wall Supply Piping, 1.5"	Box	250 ft	76 m	1.5	38	2.0	51
