

FlexWorks International Flexible Supply Piping (ENI 4125 Approved)

OPW Fueling Containment Systems FlexWorks flexible piping utilizes fully bonded, premium PVDF construction to offer complete peace-of-mind protection, performance, installation ease and advantages over rigid and semi-rigid pipe.

Features and Benefits

Why FlexWorks Flexible Piping?

Lower Installation Costs

- Eliminates the hassles, installation time and potential leak points of rigid pipe installations
- Easy installation results in less installation time
- Eliminates burdensome cutting, fitting, and cleaning
- No adhesives, heat assists, curing problems or electrofusion welding of joints
- Easy to bend - no special fittings to install in order to make bends

Eliminates potential underground leak points

- No underground fittings or joints
- No hand-built field joints
- All termination points are contained in sumps
- Termination joints precision swaged to simulate factory-made assemblies

International Supply Piping (EN14125)

Double Wall and Single Wall Flexible Supply Piping

International Approvals: EN (#14125), Kiwa, IP, ERA, EMPA, FTZU, SEV, LSCDA LNEC/ DGE, PUFO, PTB, STK TU

FlexWorks Double Wall Flexible Primary Pipe Ordering Specifications *
