

South Africa, Total Petrol Station

Fibrelite Supply Direct Fill Sumps, Tank Sumps and Manhole Covers for a Truck Stop area in Cape Town, South Africa

Now allowing easy and safe access

Fibrelite's lightweight, watertight manhole covers, tank sumps and direct fill sumps have been specified by Total in South Africa.

Fibrelite's access covers are lightweight, durable and very strong. Every Fibrelite cover is manufactured using high-technology RTM production methods to create a highly engineered, monolithic composite product.

900mm (36") Fibrelite cover (FL 90) with 40 tonne load rating

Watertight Fibrelite 450mm (18") round covers (FL 180) and lifting aid (FL7A)

Fibrelite cover with easy to remove FL7A lifting Aid over a 1.2m (42") watertight turbine sump

Highly Effective in Preventing Water Ingress

Many areas have persistently high water tables and Fibrelite's vacuum testable tank sumps have proved highly effective in preventing water ingress and subsequent damage to tank top equipment and possible water contamination to the fuel.

Fibrelite direct fill spill buckets (without drain back to tank) specified by Total

Highly Effective in Preventing Fuel Spills when Refuelling

Fibrelite's easy to install, fully testable direct fill sumps can be supplied with or without a fuel drain back to the tank. The primary containment bucket is supplied with an inspection port to view the secondary containment during routine maintenance.

Industry Leading Composite Covers

Fibrelite's industry leading 25 and 40 tonne rated covers are used on fuel stations all over the world in the toughest of conditions. Watertight and easily removable - they are the preferred choice of oil companies worldwide and are supplied with a 15 year warranty against structural failure from date of installation*.

(* Problems caused by faulty installation are not covered by this warranty. This warranty applies only if parts have been installed in accordance with Fibrelite installation and operating instructions.)
