

SureLok[™] Dual Point Drop Elbow

Civacon's SureLok[™] Dual Point Drop Elbow has safe, sure, quick connections. SureLok[™] delivers on all counts...

That's the name of the game!

Civacon engineers its product delivery elbows to deliver optimal flow, long term durability and value. We also realize that operator safety and ease of use are also real issues. The ergonomic design of the 65TT Series SureLok[™] Dual Point Drop Elbow makes this product delivery elbow easy to handle and connect

Features:

- Unique upward rolling cam mechanism requires noticeably less force to operate
- Proprietary handle design locks toward the hose adaptor promoting easy connection and a sure seal
- Protected, integrated lock design increases safety
- SureLok's[™] free floating linkage eliminates friction and binding for smooth, easy connections; no grease fittings, no mess
- Heavy duty stainless steel linkage pins and washers ensure greater reliability and longer life
- Tubular sight glass design makes it easy to monitor product flow, day or night
