Rev. +, Oct 2009

Take control of your tank trailer air system operations with our new CivaControl™ II air control panels that can easily operate in the coldest conditions. These new lighter controls feature a modular design that reduces weight and complexity. Yet still makes it ready to handle your heavy duty Petroleum Operation day in and day out.

SCP-5

Features

- Modular (Stackable) 3-2 Ported Valve Block Design
- Maximum pressure 150 PSI
- Aluminum Knob spaced for gloved operation
- Positive air reset / shut down feature ensures no valve is left open after shutting down the master valve
- High air flow in a small package ensures quick opening and fast shut down
- High endurance urethane seals rated at -40º F (-40º C)
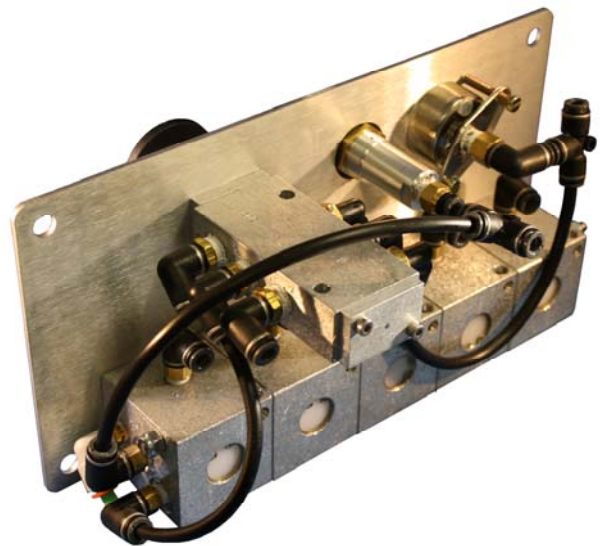

Safe Operation

- CivaControl™ II air system gives you the safety of sequenced air controls, that properly control the loading and unloading
- Master positive air shut down protects your tank and the environment by automatically closing all open valves
- Pressure gauge and vents open Indicator for that extra visual assurance and peace of mind

Installation

- Easy to install, complete package installed on panel with DOT air fittings pre-installed
- Individual modular air blocks can also be purchased and assembled to suit your unique needs
- The complete panel incorporates pressure gauge, pop-up indicator, master control valve and stacked push/pull valves

Product Specifications

Product Number

SCP-2 thru SCP-7 (Five Compartment is shown)

Panel Dimensions:

Height - 7"

Width - 13.5" or 17.5"

Distance between knobs - 2"

Materials:

Aluminum, Stainless Steel, Brass and Plastic

Weight:

6.8 lbs. (3.09 kg) (As Shown)

Operating Air Pressure:

90 –150 PSI

Temp. Range:

-40^0F to 160^0 F (-40^0 C to 70^0 C)

SCP-5 (Shown)
