

TOTAL TRUCK-TANK CONTROL IN ONE SYSTEM

Take total control of your truck tank with CivaCommand from Civacon.

Designed as the truck tank's nucleus, CivaCommand's touchscreen display interface seamlessly integrates truck-tank technology (air-operated manifold, overfill protection and pneumatic controls) giving you complete control during loading and unloading.

Features & Benefits

- Durable touchscreen incorporates all overfill and pneumatic-control technology into one unit
- Simplifies the loading and delivery process while protecting the equipment and product
- Controls Pump PTO to ensure proper operations when used with an air-operated manifold
- Incorporates a fuel-identification sensor that automatically identifies the fuel being loaded into the compartment
- CivaCommand COPS cross-over prevention technology protects against product mixing inside the manifold
- Intuitive maintenance technology allows issues to be self-diagnosed in the field
- Built-in fault logging to minimize downtime
- CivaStar overfill technology provides seamless communication
- Optimum productivity through truck and operator tracking technology
