GET CONNECTED TO YOUR TRAILER AND TAKE COMMAND OF YOUR FLEET.

CIVACONNECT
Integrated Asset Management

CivaConnect's remote live tracking provides real-time notifications and critical alerts, allowing you to optimize your fleet's uptime

CivaConnect is CivaCommand's data-management system that will give you total control and improve your fleet's performance by providing:

Advanced retain protection– Address retain and product shortage at the point of delivery

System bypass– Alerts when COPS bypass is activated

Non permissive alerts– Real-time notification of overfill, grounding issues and more…

Preventative maintance schedules– Annual inspection, leak testing, license expiration…

Trailer inventory– View product in each compartment, including empty status

Trailer location– Mapped GPS location

Trailer status– Enroute, delivery, loading, out of service

Efficiency tracking– Monitor driver, trailer and site performance

Analytics– Review critical data points to improve forecasting and performance trends

BE WHERE YOUR FLEET IS.
