

Aluminum Manhole Covers

Rev. +, Dec 2009

Civacon is pleased to offer our newest Manhole in our lineup, our all cast aluminum manhole. This manhole meets or exceeds industry standards in Australia, Europe and DOT406. This manhole is available in 20" clamp ring mount and bolt on applications. Our manholes set the standard for precision and durability.

Features

- Civacon manhole covers are designed and certified in accordance with DOT 406, EN13314 (Australian drop-test) and EN13317 standards
- Self-Latching automatic closure and locking for safety
- Pressure vacuum vent fitted as standard
- Spring loaded fill cap provides emergency fire engulfment venting
- Automatic sealing of the P/V vent in a roll over situation prevents dangerous and costly spillage
- 20" base plate for ease of access
- 10" fill hole for easy drop pipe insertion when top loading
- Self aligning seal ensures pressure tight operation at all times
- Two stage opening allows safe release of residual compartment pressure before fully opening fill cap
- Lightweight aluminum base plate for increased payloads
- Low profile design minimizes roll over protection requirements
- Accessory ports for high flow compartment vent (T195SV), overfill prevention sensor and PV vent.
