**Subject:** OPW Working Closely with Pacific Pride to Ensure  
Future Transaction Processing Capability

**Dear Valued Distributors,**

In light of the recent announcement regarding the discontinuation of the SmartLock CPU and Satellite authorization system, OPW is pleased to provide an update on its progress toward a new version of the FSC3000™ specifically for the Pacific Pride network's new transaction authorization infrastructure.

Please share this [update information](#) with your Pacific Pride customers to let them know that their significant investment in OPW products will be protected now, and for the foreseeable future. OPW will also be reaching out directly to our mutual customers to inform them that the OPW distributor network will still be able to provide viable equipment solutions and support in the future, as the network evolves.

Regards,  
**Phil Carlin**  
President, OPW Fuel Management Systems
