

## A-541 Series Modified Bottom Outlet Plug Valve

### The ONLY direct replacement for ACF-1576 Bottom Outlet Valves

Midland's A-541 Series Modified Bottom Outlet Plug Valve is engineered as a direct replacement for the ACF-1576. Constructed with 304 stainless steel, an integrated spring-loaded plug, a triple seal and cavity-free design, the A-541 enables customers to replace worn or damaged ACF gate valves without having to modify existing tank cars.

### Features and Benefits

- Only replacement for ACF-1576 gate valve provides economical option for retrofits without tank modifications
- Proven 304 stainless-steel wetted material parts, optimized for vegetable oil, biodiesel and asphalt service
- Two-piece construction enables internal mounting
- Self-cleaning, cavity-free design
- Spring-loaded plug ensures valve remains closed during an incident
- Temperature and cycle-tested
- AAR-approved E142002 for service trial
