

SERVICE BULLETIN 20171122

November 22, 2017

The following is an informational bulletin. No action is required. The change detailed here impacts Midland A-720 Series Carbon Steel Angle Valves produced from November 2017 onward.

720-4-CS Casting Change

In order to reduce foundry scrap, Midland has added material as indicated below to the 720-4-CS valve body. The top flange bolt hole is now a blind hole. Now, there are two through and two blind holes to mount the flange. The flange bolts remain the same. Nothing else has changed on the body. The form, fit, and function remain the same. The bodies are interchangeable and will function the same.

If you have any questions, please contact me. The contact information is below.

Regards,

Bob Rath
