**TECHNICAL SERVICE BULLETIN 20200717**  
**A-220 VACUUM RELIEF VALVE OBSOLESCENCE**

Dear Valued Midland Customer,

As you know, all organizations must continually improve to remain competitive. One way to do that is to reduce complexity by consolidating SKUs. We have completed an effort to more easily identify products equivalent in fit/form/function across our Vacuum Relief Valve product lines. Moving forward, only the stainless-steel A-222 models will be available, which is a fit/form/function equivalent to the A-220. The table below cross references the carbon-steel A-220 model to its stainless-steel A-222 equivalent:

To Be Obsoleted (Carbon Steel)	Stainless-Steel Equivalent
A-220-W-NS-FR20-4	A-222-W-NS-FR20-4
A-220-W-NS-3	A-222-W-NS-3
A-220-W-NS	A-222-W-NS
A-220-W-NS-5	A-222-W-NS-5
A-220-W-NS-4	A-222-W-NS-4
A-220-W-NS-FR20-3	A-222-W-NS-FR20-3
A-220-W-NS-FR20-5	A-222-W-NS-FR20-5
A-220-W-NS-FR20	A-222-W-NS-FR20-MO
A-220-W-NS-1.5	A-222-W-NS-1.5
A-220-W-RS-NS	A-222-W-RS-NS

To aid in this transition, there will be a percentage discount for all quantities of 220-1-CS or A-220-W-NS Vacuum Relief Valves ordered based on the chart below:

Quantity	Discount Percentage
0 - 25	30%
25 - 50	40%
50+	45%

These discounts will be offered until Oct. 17, 2020. After that date, both the A-220-W-NS assemblies and the 220-1-CS will no longer be available, and the 222-1-MO will need to be ordered in their place.

If you have any further questions, feel free to contact your regional sales manager, customer service representative or myself.

Sincerely,

Brenden Yung
