TECHNICAL SERVICE BULLETIN 20201020
A-220 VACUUM RELIEF VALVE OBSOLESCENCE

Dear Valued Midland Customer,

As you know, all organizations must continually improve to remain competitive. One way to do that is to reduce complexity by consolidating SKUs. We have completed an effort to more easily identify products equivalent in fit/form/function across our Vacuum Relief Valve product lines. As previously mentioned in TECHNICAL SERVICE BULLETIN 20200717, moving forward, only the stainless-steel A-222 models will be available, which is a fit/form/function equivalent to the A-220. The table below cross references the carbon-steel A-220 model to its stainless-steel A-222 equivalent:

Obsolete (Carbon Steel)	Stainless-Steel Equivalent
A-220-W-NS-FR20-4	A-222-W-NS-FR20-4
A-220-W-NS-3	A-222-W-NS-3
A-220-W-NS	A-222-W-NS
A-220-W-NS-5	A-222-W-NS-5
A-220-W-NS-4	A-222-W-NS-4
A-220-W-NS-FR20-3	A-222-W-NS-FR20-3
A-220-W-NS-FR20-5	A-222-W-NS-FR20-5
A-220-W-NS-FR20	A-222-W-NS-FR20-MO
A-220-W-NS-1.5	A-222-W-NS-1.5
A-220-W-RS-NS	A-222-W-RS-NS

As of Oct. 19, 2020 both the A-220-W-NS assemblies and the 220-1-CS are no longer available, and an A-222-W-NS equivalent or the 222-1-MO will need to be ordered in its place.

If you have any further questions, feel free to contact your regional sales manager, customer service representative or myself.

Sincerely,

Brenden Yung
