**TECHNICAL SERVICE BULLETIN (TSB) 20250227-01**  
**Issued February 27, 2025**

**A-720 Series, 2" Angle Valve Conversion Kits**

**Items Affected:** A-720, A-721, A-721-B, and A-724 Angle Valves

**Summary:** On May 25, 2018, Midland issued Technical Service Bulletin 20180525-02. This bulletin covered conversion kits for our 2" Angle Valves, which have since been supplied at no charge to our customers.

At the end of 2024, Midland has shipped several thousand more kits than were in the original population of angle valves impacted. These kits were supplied free of charge to car builders, owners/lessees of tank cars, and repair shops.

As of April 1, 2025, we will no longer be supplying these hardware conversion kits at no charge.

Kits impacted by this change include K-720-100, K-721B-100, and K-724-100.

**Note:** At the start of 2024, we launched standardized repair kits for all product families. All current Angle Valve repair kits include the hardware items that were supplied in these free conversion kits.
