New OPW 3D Free Product App

Dear Valued Distributor:

We are proud to announce the release and availability of the new OPW 3D Product App for Android and iOS. This mobile app will give you the ability to review and manipulate OPW Retail Fueling equipment in a virtual 3D environment.

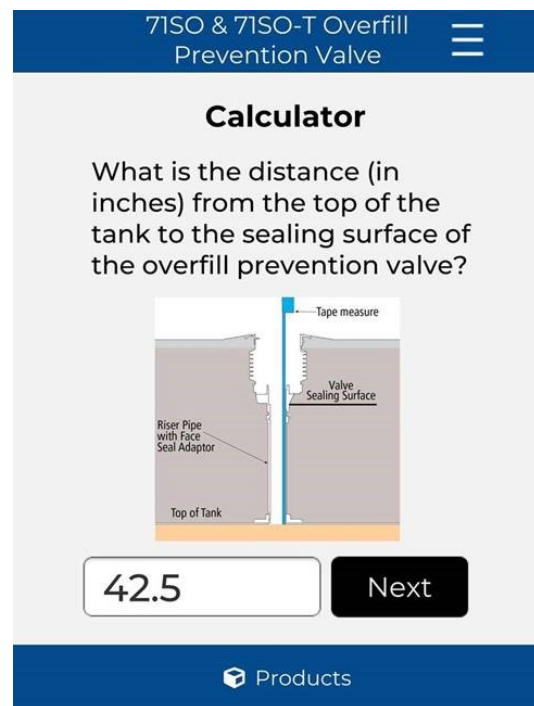

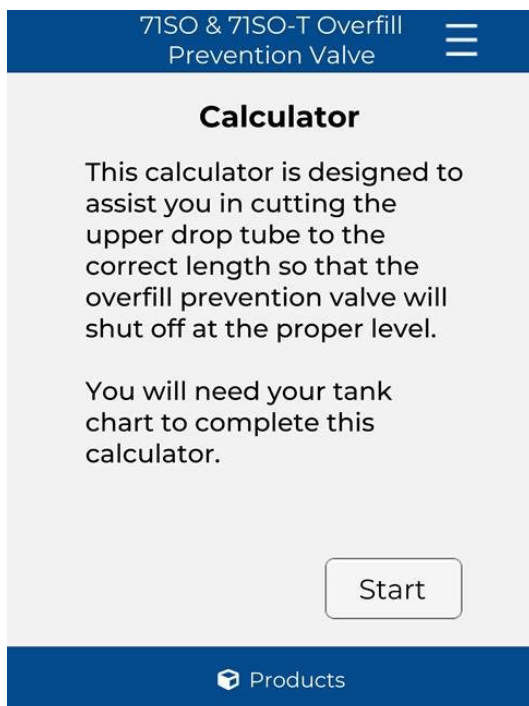

Fig. 1.1: Sample screens from OPW Retail Fueling App

In addition to viewing the photo-realistic models, users can get part numbers and even installation videos within the app. This will allow our Distributors to meet with customers and show them details of their equipment purchases without having to carry large, heavy and bulky cutaways into an office. Your staff at the Parts Counter will find many uses for the detailed information available within the app and your technicians and installers will be able to look up specifications like torque settings and tools needed to install OPW equipment.

A final benefit of this app is the 71SO/71SO-T Upper Tube length calculator. This wizard will walk your installers step-by-step through the process of calculating the upper tube length - all without solving complex equations!

To download and install the new OPW 3D App on your mobile device, just visit the **Google Play** or **Apple Store**. Search for "OPW," locate and download the free app.

While most people will need no training on how to use this app, we have created a very short tutorial video that reviews the four key features of the app. You can view the tutorial [HERE](#).

We always welcome your recommendations and questions, so if you want to contact us, please feel free to email training@opwglobal.com.

Best regards,

Lewis Bell

Director of Training
