OPW Introduces 61TEST Retrofit Kits to Allow Easier Testing of 61fSTOPs

Dear Valued Customer,

OPW is pleased to announce the release and availability of the new 61TEST kits. Once installed onto a 61fSTOP AST overfill prevention valve, these kits allow you to test the shutoff functionality of your 61fSTOP without removal of the valve.

Much like the popular OPW Testable 71S0, the 61fSTOP fitted with a 61TEST kit incorporates an easily accessible, external test plug. The plug can be loosened with a standard socket and then raised and lowered, allowing the user to verify the valve operation. This meets the testing procedure described in PEI RP600. The plug uses an o-ring to form a seal, so thread sealant is not needed for initial installation or when the plug is reinstalled after a test. NOTE: Thread sealant should not be used on the 61TEST plug at all.

These kits can be used to retrofit 61fSTOPs already installed in the field or on brand new valves. Kits pre-installed onto new 61fSTOPs are not available.

These kits are compatible with both the standard 61fSTOPs and methanol compatible models, both arm and cylindrical float models, and come in two different versions for 2" and 3" sizes.

Part Number	Description	Used on	List Price
61TEST-2	Test Kit, 61fSTOP 2"	61fSTOP-1000, -100M, -2000, and -200M	\$204.00
61TEST-3	Test Kit, 61fSTOP 3"	61fSTOP-3050, and -305A	\$244.00

If you have any questions, please contact your local OPW District Manager or our Customer Service department at 1-800-422-2525. If you would like more information on our complete product line, please visit our website at www.opwglobal.com. As always, we appreciate your continued support!
