OPW Obsolete Tank and Dispenser Sumps

Dear Valued Distributor:

Tank Sumps

With the launch of our new **FibreTite** and **ElectroTite** series of **Fiberglass Tank Sumps**, OPW will be phasing out our legacy Tank Sumps this Spring. This will include our **TSMF model series** and our **TSMD model series**.

Our newer **FibreTite** models feature an easy entry water tight lid with "L" shaped handles for visual confirmation of a sealed clamping. The **ElectroTite** models combine these features with a revolutionary conduit entry box to create the **industry's most water tight sump available!**

[Please click here to download a Conversion Table](#) to help you identify which new model has similar dimensions to the models we are phasing out. We have approximately 80 of the TSMF-4536 and TSMF-4536CL models available and we have approximately 40 of the TSDF-4536 and the TSDF-4536CL models available for final purchase. Once these are gone, the models will be obsolete.

OPW is also phasing out our **MBS-3645H Polyethylene Tank Sumps** this spring as well. We will continue offering the TSM-4536 and the TSM-4536CL Polyethylene models that have nearly identical dimensions and are designed for enhanced protection against water intrusion. We currently have around 30 models left in inventory of our MBS-3645H. Once this inventory is exhausted, MBS-3645H will be obsolete.

Please note: Replacement lids, seals and knobs are still available for existing installations of our TSMF, TSDF and MBS Series of sumps.

Dispenser Sumps

The Dispenser Sumps shown in the table below have also been obsoleted. Each model has an alternative that is available now.

Obsolete Models	Alternative Model
DSF-1117F DSW-1117F	DS-1117F
DSF-1229 DSW-1229	DS-1229
DSF-1242 DSW-1242	DS-1242
DSF-1642 DSW-1642	DS-1642
DSF-1922	DSW-1922

Miscellaneous Items

We have also made the following **Jacket Cutters** obsolete as well: **JCT-0075, JCT-0100, JCT-0150, JCT-0200 and JCT-0300**. Based on the availability of double-wall couplings for all of our double-wall pipe sizes, it should no longer be necessary to use these jacket cutters.

Also, part number **PPT-0810** which is our **Pump Porch Top for use in PMC Dispensers** is also obsolete. We no longer manufacture this item.

As always, we appreciate your continued support of OPW products. If you have any questions, feel free to contact your OPW District Manager or our Customer Service Department at 1-800-422-2525. If you would like more information about our complete product line, please visit our website at www.opwglobal.com.

Best regards,

Charles Liebal
Product Manager
