

Bolt-Down Manhole Water-Shroud System Option

The Bolt-Down Multiport Water Shroud (MPWS-BD) is designed to mate with the OPW Multiport. The MPWS-BD isolates surface water and condensation from Tank Sumps.

Shroud boots isolate the spill-container buckets using stainless-steel band clamps, providing a tight seal between the water-shroud top hat and the underside of the spill-container-mounting ring. Bolts on the outer edge of the shroud cover secure it to the top hat. Available in 33" and 39" diameter covers.

Compression Seal
Positive Seal Arrangement Prevents Water from Entering Sump

Machined Groove
Provides Consistent Factory Sealing Surfaces to Prevent Groundwater Ingress

Water Shroud Cuff
Increased Sealing Surface for Maximum Protection

Bolt-Down Shroud
Maximum Mechanical Stability for Robust Watertight Protection

106 Product Identification Anchors

OPW 106 Identification Anchors are used to identify the product stored in the underground tanks from grade. The 106F-KIT is designed to be universally used with all OPW 1TAGs. Over 30 identification anchors are possible. The 106F-KIT comes with a clear epoxy kit that can be installed on top of the OPW 1TAG for encapsulation and protection. Pairing the 106F-KIT with an OPW 1TAG will satisfy API color coding and identification of over 25 potential fueling products.
