

MATADOR

COMPOSITE COVER

Gain independence from heavy steel covers with this all-new composite cover. OPW engineered the Matador with next generation composite technology to make it the lightest cover in the industry, and priced it to compete with any cover on the market for use at petroleum retail operations, in addition to use for commercial and industrial driveway applications.

Available in 37" and 42" options, the Matador Composite Cover is lightweight, water resistant and extremely durable. Standout features include a steel frame, stainless steel recessed lift handle and a polyethylene skirt with a flair that prevents corrosion and rust. The lightweight design and slip-resistant tread pattern helps to prevent the risk of back, foot and hand injuries. The Matador makes sump accessibility safer and easier than ever before.
