OPW FibreTite Multiport Spill-Containment

OPW "FibreTite" Multiport Spill-Containment Manholes provide spill-containment for underground storage tank (UST) fill pipes and vapor recovery risers.

Multiports are installed over the top of tank sumps to preserve future access to the tank top and to facilitate containment of tank-bung fittings.

OPW "FibreTite" watertight covers are easy to remove. The composite manhole covers are available with center or offset port for access to fill risers.
