

Materials

Shear pin: carbon graphite

Link: stainless steel

Bar: cast iron

Lid and body: aluminum

Sealing surface: Teflon®-coated aluminum

**202F SCFH @ 2½ PSI
(0.17 bar)
8" 560,000**

202F

Features

- ◆ **Lightweight Construction** – Allows for safe, easy installation on large aboveground tanks.
- ◆ **Spring-Loaded, O-Ring Sealed Cover with Teflon-Coated Seat** – Ensures smooth, vapor-tight sealing surface and reliable service life.
- ◆ **Full-Bore, High-Capacity Upward Venting** – Enables smaller diameter vents with higher venting capacity to be used on ASTs when compared to weighted, mushroom-style vents.
- ◆ **Aluminum Cover and Body with Stainless Steel Components** – Corrosion-resistant construction to protect expensive finish or epoxy coatings on ASTs.
- ◆ **Alerts Tank Operators of Possible Venting Problems** – When the emergency vent is actuated, the lid remains open for inspection until manually reset. The actuation of the emergency vent indicates abnormal excessive pressure build-up in the tank due to either a blockage in the normal tank vent or in the event of a rapid expansion of vapors, possibly from a fire.
- ◆ **3-Point Vent Shear System** – Ensures the vent safely opens every time, even if non-OPW replacement parts are utilized. Shear Pin breaks at 2.5 psi (0.17 bar), Break Link breaks at 3.5 psi (0.24 bar), and Bar breaks at 6.5 psi (0.44 bar).
- ◆ **UL Listed** - To satisfy Third Party accreditation requirements of many jurisdictions.

OPW 202F EMERGENCY VENTS

The OPW 202F Emergency Vent is designed to prevent an aboveground storage tank from becoming over-pressurized by providing full-bore, high-capacity venting in the event of a fire or blockage of the OPW 23, 113, 523V or 623V. The 202F is a vapor-tight, spring-loaded emergency vent. When the AST builds pressure to 2.5 psi (0.17 bar), a break-pin shears and the spring-loaded lid opens full-bore and discharges vapors upward to relieve the pressure. The lid remains open for inspection, to indicate a problem with the normal tank venting or if a fire has taken place, until manually reset. The appropriate 202F Series vent is determined by the emergency venting capacity requirements of the AST and the type of connection at the tank's emergency vent opening. The OPW 202F Emergency Vent is available in an 8" flanged connection to mount directly to a tank manway.

Ordering Specifications

Model #	in.	mm	lbs.	kg
202F-0600	8	203	5.2	2.4

Dimensions 202F

Description	in.	mm
A - Flange Hgt.	13/32	10
B - Hole Dia.	7/16	11
C - No. of Holes	8	203
D - Bolt Circle	9 1/2	241
E - Flange Dia.	10 3/8	264
F - Height	12 1/32	48
G - CL of Pivot Pt.	6 1/32	155

Replacement Parts

Key	Part #	Description
1	H04869RE	Break Link
2	H06475RE	Rivet
3	H04981M	Cotter Pin
4	H04928	Parts S/A
5	H04929M	Screw
6	C01288I	Bar
7	H04871M	Break Pin
