

**OPW Island Forms - Options**

- Half-Circle ends available up to 5 ft. diameter in 1 ft. increments
- Square 6"-radius ends available in any width in ½ ft. increments
- Custom overall lengths available, in ½ ft. increments
- Custom shapes (using 90-degree bends) available upon request
- Available in painted steel and stainless steel
- **NEW!** ADA-Compliant ends, in both half-circle and square 6"-radius shapes

**ADA-Compliant Ends**

- Per the American with Disabilities Act (ADA) 2010:
  - At least 1 dispenser per site must be ADA-compliant
  - The maximum height for card readers and other "operable Parts" is 48" on new curb installations
  - Refer to section 308.3 in the 2010 ADA for more information
- On some newer dispensers, in order to meet this requirement and maintain a 6" curb on the Island Form requires **zero concrete slope**
- ADA-Compliant, two-level island form provides 6 inches of offset, so both requirements can be met and concrete can be poured with slope

**The OPW Advantage**

- Free freight on orders over \$5,000: add Island Forms to your existing OPW orders to meet threshold
  - Don't forget our Pipe Guards/Bollards – they also ship free on the minimum order
- Single Source Advantage: we have everything you need to get the job done
- Patented interlocking Island Form Sections
  - Allow us to ship in boxes, preventing damage during shipping
  - We can ship Island Forms up any length without the need for special shipping accommodations
  - No welded joints, reducing the rust potential
  - Can be assembled around canopy columns easily – no need to cut and re-weld
  - Unique sump mounting system is adjustable to accommodate various width sumps
  - If layout changes on-site, Island Form can be reconfigured easily by ordering a few extra pieces
