

DSE Dispenser Sump

Most dispenser sumps force fueling station operators to choose between quality, speed or value. Produced using an Advanced Composite Technology manufacturing process, the DSE Dispenser Sump can deliver all three: best-in-class quality, fast lead times and affordability without sacrifice. The DSE is installed beneath fuel dispensers to provide access to secondary containment of dispenser plumbing, emergency shear valves and underground piping connections.

Sump Component Part Numbers

Part #	Description
215192	Universal Base. Combine with 215567, 215568 or 215569 to make a complete DSE sump
215567	Gilbarco Encore Top. Combine with 215192 to make DSE-1836
215568	Wayne Ovation Top. Combine with 215192 to make DSE-1543
215569	Wayne Helix Top. Combine with 215192 to make DSE-1741

The DSE can be ordered as a complete sump (one top and universal base), or the tops and universal base can be ordered as individual components
