

Introducing Next Generation OPW FlexWorks Pipe

Why a new pipe?

OPW Fueling Containment Systems has developed a Next Generation FlexWorks Pipe in response to the voice of the customer. You asked and we delivered! The new pipe is more flexible, lighter and has reduced memory.

UL APPROVALS

- ✓ Motor Vehicle Fuels
- ✓ High Blend Fuels
- ✓ Concentrated Fuels
- ✓ Aviation and Marine

**Lighter,
More Flexible, Easier
to Install, UL Approved
for All Fuels**

What makes this pipe so different?

- **Increased Pipe Flexibility** – the force required to bend the pipe has been reduced to facilitate piping layout. This makes installation quicker and easier, especially in cold weather.
- **Pipe Weight** – has been reduced to facilitate shipping and handling
- **Pipe Memory** – Inherent pipe memory has been reduced significantly to facilitate connection of pipes inside sumps
- **Redesigned Profile for Enhanced Leak Detection Performance**
- **Next Generation Enhanced KYNAR Liner**
