

# Introducing the New "Protection Standard" in Emergency Shut-Off Valves

**Now You Can Protect Your Customers, Investments and the Environment against the Perils of Undetected, Low-Impact Breaks**

## Why Specify Anything Else?

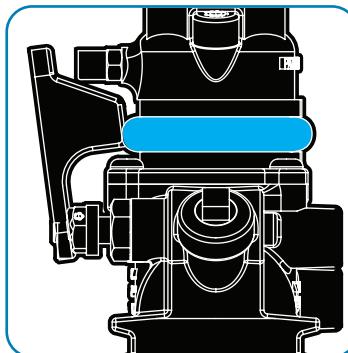

OPW raised the protection-standard in emergency valves when it introduced the first double poppet valve back in 1989. This industry-changing OPW innovation helped to significantly reduce the risk of fire, explosion, personal injury, property damage and environmental contamination at sites around the world. Major oil companies and jobbers agreed that providing added protection for their customers, investments and the environment were the three most convincing reasons for switching to the innovative new valves.

Those same reasons are still prevalent today and serve as the inspiration behind the design of the **New OPW 10 Plus Emergency Shut-Off Valve** - leading-edge innovation for today's safety conscious marketers and the new standard of protection in emergency shut-off valves. By eliminating the risks of low-impact breaks, the New 10 Plus offers a logical, simple and affordable way of providing an added level of security and peace-of-mind protection of customers, investments, and the environment. The new OPW 10 Plus is unlike any other emergency valve, featuring all the time-tested, reliable features of the 10 series plus:

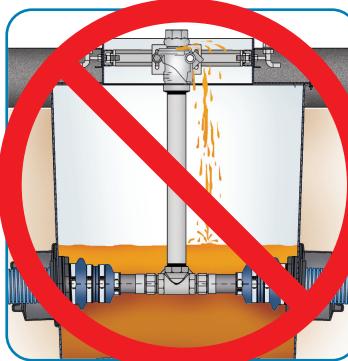

### ◆ Patent-Pending Smartguard™ Design

- Designed to contain a leak at the shear groove and activate the valve shut off mechanism in the event of an unsuspected low-impact fracture in the valve
- Designed to prevent fuel from leaking into sumps to significantly reduce the risk of environmental contamination and sump fires
- Designed to eliminate hazardous and costly clean-up due to fractured valves leaking at the shear groove

## UNPRECEDENTED PROTECTION AGAINST LOW-IMPACT BREAKS

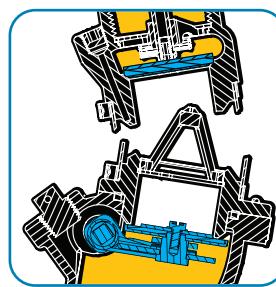

OPW 10 Plus

The New OPW 10 Plus is the Only Emergency Shut-Off Valve in the Industry Designed to Contain a Shear Groove Leak and Close the Flow of Fuel In the Event of an Undetected Low-Impact Break

- Provides peace-of-mind comfort that an unnecessary leak risk at your site has been eliminated
- Eliminates health, environmental contamination and fire hazards that could result from fractured valves leaking into sumps
- Prevents undetected product loss
- Prevents hazardous and costly clean-up

## TIME-TESTED, FIELD-PROVEN SHUT-OFF RELIABILITY

OPW 10 Plus

The New OPW 10 Plus is Built Upon the Design Platform of the World's Most Specified Emergency Shut-Off Valve, the OPW 10 Series.

- Unique Linkage Arm is designed to close the poppet in the event of impact, ground shift, earthquake or when activated by the SmartGuard™ as a result of a leak caused by an undetected shear groove fracture
- Double poppet design helps to provide for a safer environment in the event of a shear and fire

## THE INDUSTRY'S BEST DETERRENT AGAINST SUMP FIRES

- The OPW 10 Plus is designed to contain fuel leaking from fractured shear grooves to significantly reduce the risk of sump fires
- In the event of a sump fire, the 10 Plus fusible link will release and automatically close the valve to reduce the fire hazard
