Containment!

NEW!

Install Today, Test for Years!

- Integrated interstitial test port, easy access for new annual secondary test requirements
- Engineered seals throughout design, no goop sealant! Made to sustain containment with today's aggressive fuels
- Compact height - screws directly onto existing 4" Risers for easy and reliable installation
- Thread-On design eliminates potential leak point at slip-on joint found in competitive units

Full Access from Grade

- Never break concrete again to service your Spill Container!
- Cartridge style Primary and Secondary can be removed separately for independent servicing needs
- Water tight top cover provides access to remove expanded 15 Gallon bellows
- Easy top access to removable snow plow ring
- Compact containment access lid helps to avert water intrusion
- Sealable Cover containment access lid available for locations with high water concerns

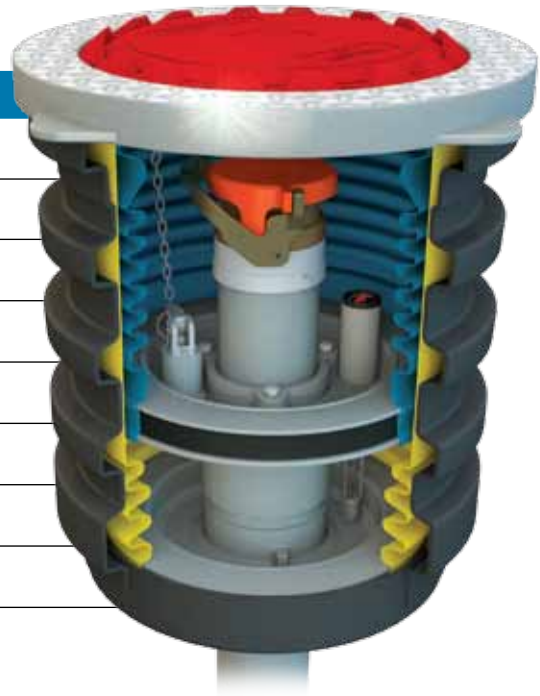

Leading The Way in Fueling Innovation Worldwide
