

OPW Fueling Containment System's Double Wall Boot Meets California 2481

The outside boot seals to the primary, secondary or chase pipe

OPW Fueling Containment Systems double wall entry boots seal both pipe and conduit entries into containment sumps.

These specialized entry boots:

- Are designed for double wall containment sumps.
- Permit continuous interstitial monitoring.
- Have three sealing boots
- Can accommodate vacuum, low pressure and liquid interstitial monitoring.
- Meet the requirements of California Environmental Legislation CA 2481
